

MOBIN MOMENI

INTERN DATA ANALYST & BI DEVELOPER

Tehran, Shahriar

+98-912-055-2434

Mobinmomeni004@gmail.com

Sep, 6, 2004

OBJECTIVE

Passionate about data analysis and dashboard design, with a foundation built through coursework and projects using python and power BI to interpret trends. Seeking an internship to further develop skills and contribute to impactful projects.

EXPERIENCE

Intern BI Developer | Shahr Bank

2024

This experience was completed as a project .

Designed and developed an interactive dashboard in Power BI to monitor IT support performance and hardware inventory for a simulated helpdesk environment in Shahr Bank.

- Integrated data from support ticket systems and asset management logs.
- Visualized ticket volume, response time, resolution rates, and issue categories.
- Tracked hardware parts, device types, and request frequency.
- Built dynamic filters for department-level and branch-level drill-down.
- Improved data model performance and enabled actionable insights for IT management.

Intern BI Developer | Andisheh Electric corporation

2024

This experience was completed as a standalone project .

- Extracted and cleansed data from company databases, ensuring accuracy and readiness for analysis.
- Developed interactive dashboards using Power BI, enabling effective monitoring of key performance indicators.
- Established and managed relationships between data tables to create cohesive data models.
- Collaborated with the data analysis team to translate requirements into actionable insights.
- Optimized data models to enhance performance and efficiency in data retrieval and visualization.

Support Specialist | Douman Samaneh (Gamma Helpdesk)

2024 – 2025

- Collected and analyzed support data to pinpoint recurring issues and trends, generating actionable insights for process improvement.
- Partnered with technical and analytics teams to diagnose and resolve complex problems by implementing data-driven solutions.
- Compiled detailed performance reports and support metrics to guide strategic decision making.
- performed user training sessions and offered ongoing guidance, leveraging feedback to refine support practices and system functionality.
- Prepared a comprehensive FAQ based on customer inquiries, reducing incoming support calls by approximately 40%.

SKILLS

- | | | | |
|-----------------|--------------------|---------|-----------------------|
| • Power BI | • Machine Learning | • Git | • Problem Solving |
| • Data Modeling | • Python | • ETL | • Time Management |
| • DAX | • SQL Server | • Linux | • Team Collaboration |
| • SQL | • Microsoft Office | | • Continuous Learning |
